

Right Hemisphere® PDF Publishing Module™

- Create powerful interactive 3D PDFs for collaboration, training, technical publications, and support documents
- Scale high volume and/or repetitive, interactive 3D PDF publishing requirements
- Customize interactive 3D PDF content and layout
- Create 3D PDFs without JavaScript programming

Introduction

Interactive 3D is a powerful communication method that greatly improves collaboration, training, and support effectiveness. The Interactive Electronic Technical Documents (IETMs) used by the military are just one example. When combined with PDF, you get a powerful, secure interactive 3D document that you know others can easily view and understand.

Delivering text, 2D, 3D, and interactivity required in higher level IETMs and other documents requires new approaches, especially if you are trying to do this in high volume. How do you meet these requirements? Do you have the technical expertise? Do you have the processes and tools? Or will you be forced to let this opportunity pass?

Right Hemisphere's PDF Publishing Module lets you rapidly design, create, and publish interactive 3D documents without programming using lightweight 3D product graphics supplied by Deep Server, Deep Exploration CAD Edition, or Adobe® Acrobat® 3D.

With Right Hemisphere and Adobe you can leverage the power of interactive 3D and PDF to improve collaboration and execution while reducing costs of creating and distributing collaboration, training, technical publication, and support documents.

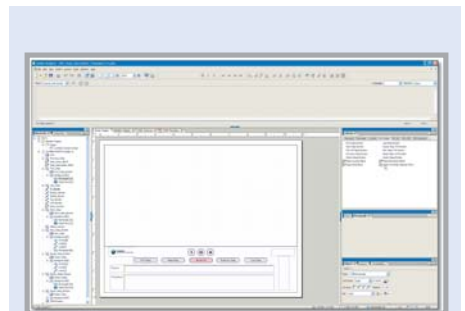

With the PDF Publishing Module you can easily:

- ▶ Publish interactive 3D PDF documents
- ▶ Create interactive 3D PDF documents using intelligent PDF templates out of the box
- ▶ Design custom PDF templates without JavaScript programming using Adobe® Designer

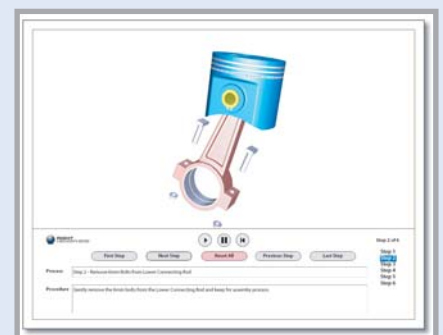

PDF Publishing Module Capabilities at a Glance

Publish interactive 3D PDF documents

- ▶ Leverage lightweight 3D product graphics for documents
- ▶ Create interactive 3D PDF documents with animations, text, and metadata
- ▶ View in free Adobe® Reader

The PDF Publishing Module provides intelligent templates out of the box to create interactive 3D PDF's without javascript.

Users can control 3D scenes within a PDF using preprogrammed buttons and control objects from an extensive 2D/3D object library found in the PDF Publishing Module.

Create interactive 3D PDF documents using intelligent PDF templates out of the box

- ▶ Simple animation template
- ▶ Complex animation template
- ▶ Stepped animation template for assembly and disassembly procedures
- ▶ Product Manufacturing Information (PMI) template (requires Right Hemisphere PMI Module™)

Design custom PDF templates without JavaScript programming using Adobe® Designer

- ▶ Design new or modify preformatted templates
- ▶ Control 3D scene using preprogrammed buttons and controls objects
- ▶ Select from extensive 2D/3D object library

Client and Server Options

You can use the client version of the PDF Publishing module with Deep Exploration CAD Edition, Deep Exploration, or Adobe® Acrobat® 3D to publish one interactive 3D PDF at a time. Or you can use the server version with Deep Server to publish 3D PDF documents in high volume.

Right Hemisphere

Right Hemisphere® is the leading provider of Product Graphics Management software. Product Graphics Management is a new category of enterprise software that supplies the right product graphics in the right format, right now for technical publications, interactive training, marketing communications, design collaboration, and more across the extended enterprise. Five of the top six automotive OEMs, nine of the top ten aerospace and defense contractors, and hundreds more customers rely on Right Hemisphere to synchronize product development and downstream PLM processes thereby accelerating time to market, increasing revenue, and reducing product lifecycle costs.
